

## HPG Room Decontamination

Airex Co., Ltd 14-13,Tsubaki-cho Nakamura-ku Nagoya Aichi.453-0015 Japan

Website: http://www.airexx.co.jp Tel: +81 524540671 Email: airex@airexx.co.jp

## **Company Overview**

# Airex exists 20 years and have a huge market share in the pharma isolator/decontamination market in Japan

Airex Co., Ltd.		
Location	Nagoya, Japan	
Establishment	1997	
Employees	~135	
Main Offerings	Isolator, RABS/Laminar, HPG Decontamination	
Notes	Established a joint venture (Tofflon Airex) in Shanghai since 2012	
	Joined 'Sinto Group' since 2014	

# Isolator Share in Japan

## Decontamination

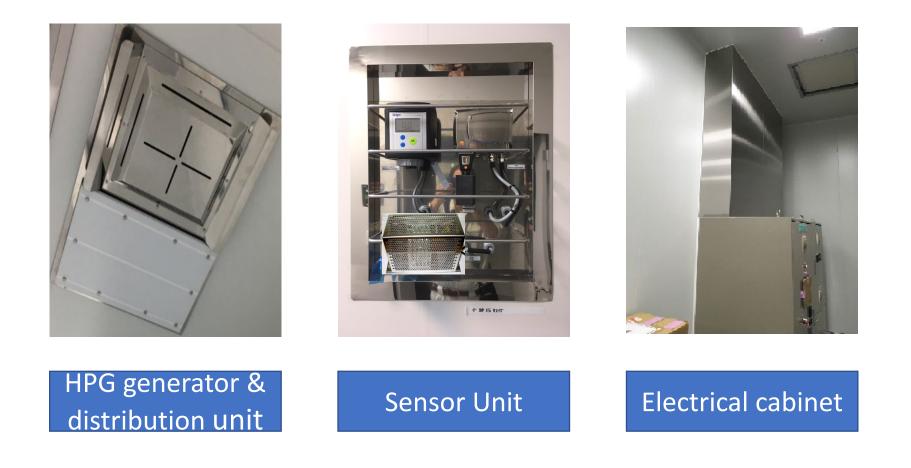

## HPG Room Decontamination (Ceiling mounted)

## Airex Super Deconta® (Ceiling mounted)

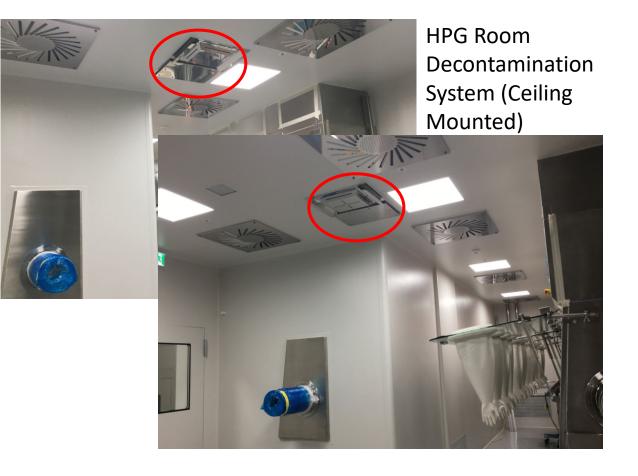

# We well understand the customer needs/requirements and prepared our concept

## **Purpose:**

Insure sterile operation in clean rooms and its supporting areas

## Include:

- Decontamination of specific areas
- Comply with cGMP, EU GMP, ICH regulations/guidelines, GAMP and ISPE guides
- Provide necessary plan and documentation for FAT, SAT, IQ, and OQ
- Electric cabinet and H2O2 feeding cabinet placed outside the decontamination room
- Temperature, Humidity, condensation and H2O2 Concentration monitoring

## HPG generator & distribution unit mounted inside the ceiling

HPG generation occurs from the HPG generator & distribution unit mounted inside the ceiling.

Easy access for maintenance purpose from the technical area.

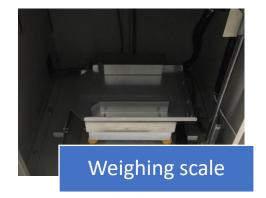

## **Electrical cabinet**

Electrical cabinet operates and monitor operation of the HPG generators & distribution unit.

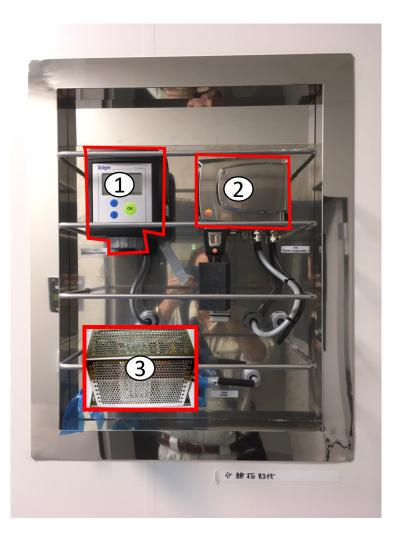

The hydrogen peroxide solution is pumped trough 6mm pipes up to the heating plate installed inside the HPG generator & distribution unit . This allows HPG generation to take place at location.

## Sensor unit mounted inside the wall

1. Concentration sensor

Thermo-hygrometer
For temperature and humidity measurement

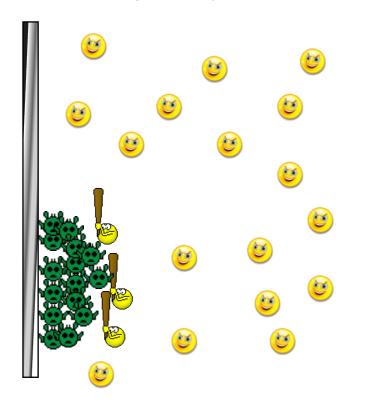

3. Micro condensation Sensor (SDM<sup>®</sup>) Airex patent

## Micro condensation sensor (SDM®)

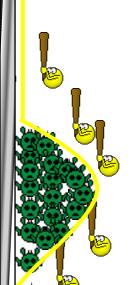

## Vapors

(statistically,  $H_2O_2$  reaches the micro organisms)

## (Micro) condensation

(H<sub>2</sub>O<sub>2</sub> covers the micro organisms)

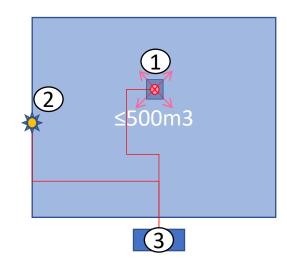

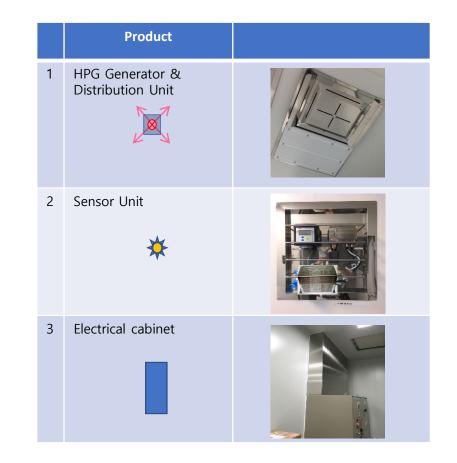

Airex Patent micro condensation sensor(SDM®)

## Based on the customer needs, we propose the amount of HPG Generators & Distribution units.

Example 1: Room Size: ≤500m3 (empty room) 1 HPG generator & distribution unit 1 Sensor Unit 1 Electrical cabinet

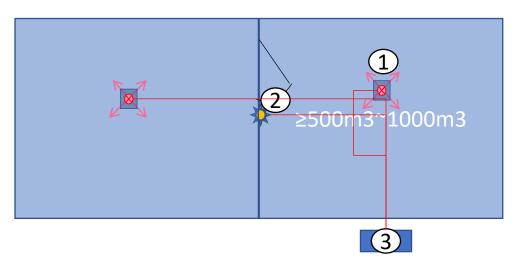

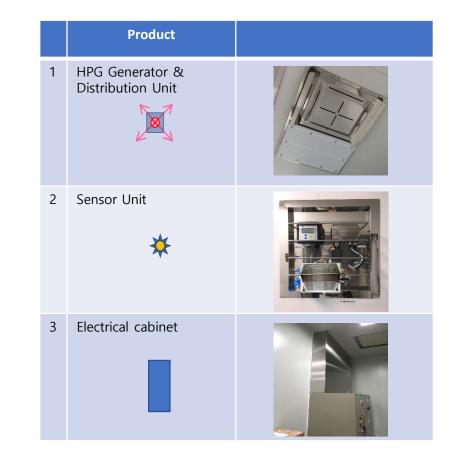

## Based on the customer needs, we propose the amount of HPG Generators & Distribution units.

Example 2: Room Size: : ≥500m3~1000m3 (empty room) 2 HPG generator & distribution unit 1 Sensor Unit

1 Electrical cabinet

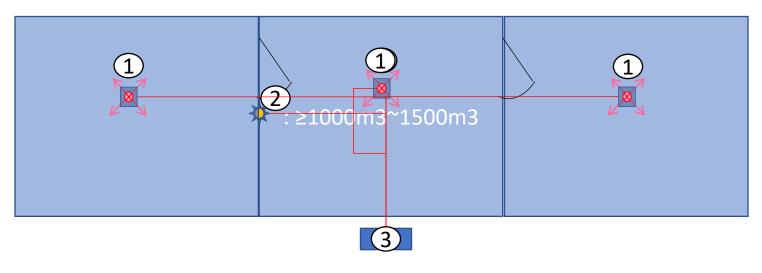

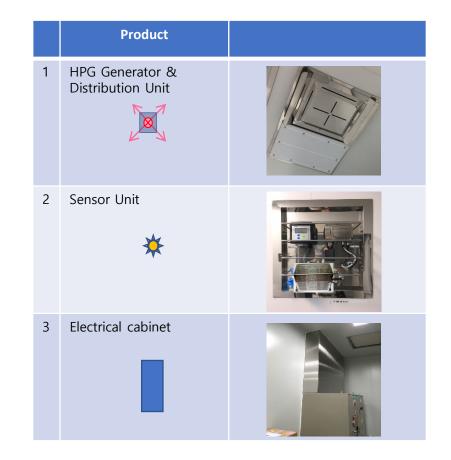

## Based on the customer needs, we propose the amount of HPG Generators & Distribution units.

## Example 3:

Room Size: : ≥1000m3~1500m3 (empty room) 3 HPG generator & distribution unit

- 1 Sensor Unit
- 1 Electrical cabinet

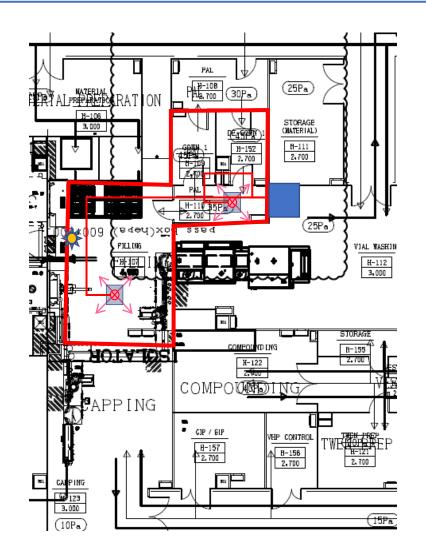

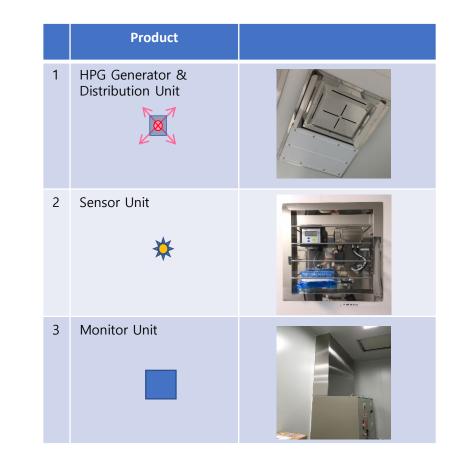

**Overview – HPG Room Decontamination (Mobile Unit)** 

Based on the customer needs, we propose the amount of HPG Generators & Distribution units. (Actual situation example)

Based on the customer needs, we propose the amount of HPG Generators & Distribution units.

- 1 HPG generator & distribution unit can decontaminate ≤250m2 based room equipment etc.
- Sensor unit will be placed in critical (cold spot) area
- Electrical cabinet operates and monitor operation of the HPG generators & distribution unit.
- Sensor unit monitors the following;
  - Micro Condensation
  - Temperature
  - Humidity
  - H2O2 Concentration (PPM)

## Why Airex?

## Cycle Development by Airex (over 20 years of experience)

#### I. A place where the air flow canot reach easily.

Examples : In a decontamination chamber/Room corner, Gloves, Any cold spot behind doors or equipment

Score 0 Not applicable

- 1 Effect Small Examples: Open corner, Equipment or glove without any obstacle in the air flow direction, and any clearance to which airflow can reach
- 2 Effect Big Examples: Complicated corner, Equipment or glove with an obstacle in the air flow direction., and a clearance to which no aiir flow reachs

#### I. A place specifically on and in the equipment.

Examples : Place which temperature is very much different from others.

Score 0 Not applicable

1 Effort Small Examples: : A place where can be easily transmitted the temperature from Heating or Cooling source

2 Effect Big Examples: : Heating or Cooling source

#### I. Critical point

Examples : Crutial place for operation, On the Product moving line, or with High decontamination load

Score 0 Net applicable Examples: A place with no intervention of human and/or materials.

- 1 Effect Small Examples: A place with gloves operation or material intervention.
  - 2 Effect Big Examples: A place with intervention of human or exposed chemicals.

#### IV. A place where is far away more than 5 m from any BI.

Note : If the place-point from a BI is just a few cm but is separated by a wall and only connected spatially through a door or something, the length away from the BI has to be calculated with the roundabout route through the door Score O Not applicable

1 Applicable

#### V. A place where a decontamination can be validated.

Examples : A place where BI becomes to be an obstacle, A place one surface matchs to another surface, or A part inside a machine

Score 0	Notapplicable
1	Applicable

(Alternate condition to the BI placing point)

For places which are applicable to all the following items, A place of highest risk score can be as an alternative point (for the ③, if 1 or 2 is applicable) For the points excluded to place BI, the alternative BI point's score has to be written.

#### The category of the points are same.

Examples : In a decontamination chamber/Room corner, Gloves, Any cold spot behind doors or equipment

#### ②An identical space without any separation.

Examples : Inside the same room or equivalent.

#### 3-1 Air flow can be easily and equaly reached.

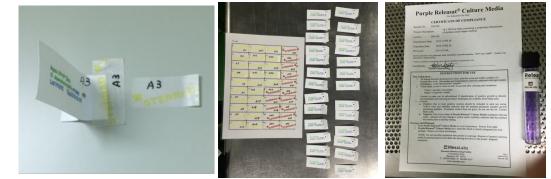

Examples : Corners which distance from H2O2 gas generator are same or closer, or parallel arranged gloves

#### 3-2 The gas diffution can be distributed easily and equaly.

Examples : A dead legs place with no air flow reached which L/D is same or shorter.

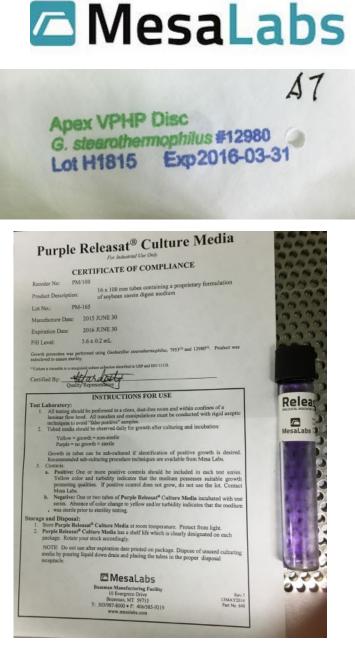

Not a specific or strange point.

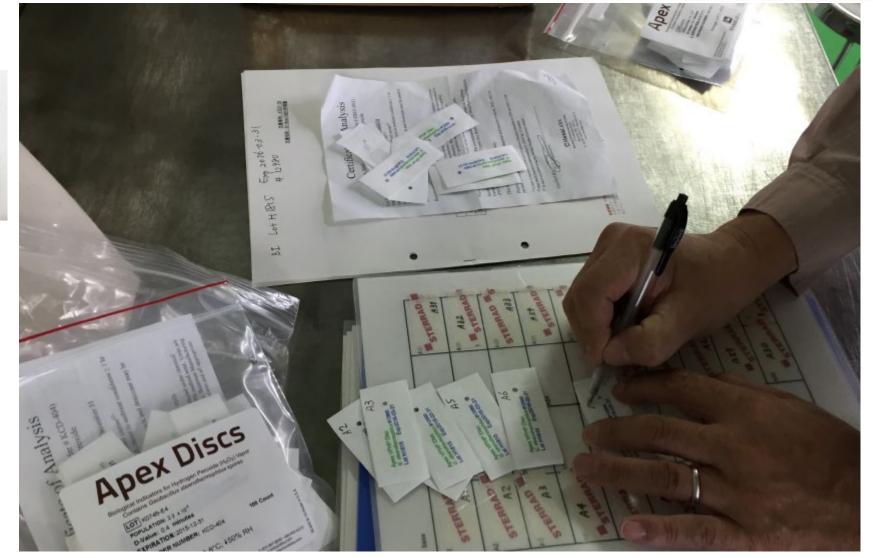

Examples : A place not closed to any heat source, nad no big temperature differences.

### Why Airex

## Available commercial 35% Hydrogen peroxide liquid can be used

No need to buy special, or brand dedicated hydrogen peroxide liquid.

Save cost by selecting a local seller.

## Why Airex

# Airex decontamination system has technological advantages that differentiate us from competitors

## Airex Technology

#### Decontamination Expertise

- We have 20 years of experience developing H2O2 decontamination and cumulated parameters
- Patented condensation monitoring system (SDM<sup>®</sup>)
- Our systematic approach to BI monitoring can

### PMDA

• We comply with latest international requirements/standards and, especially in Japan, our CEO involves in regulatory activities including PMDA inspectors training

### > UPS

- UPS enables data saving during electricity issues
- Stainless steel
  - All Stainless steel equipment offers resistance to corrosion

### Piping and On-site Gas Generation for ceiling mounted

- Our room decontamination system transfers hydrogen peroxide liquid trough 6mm pipes up to the heating plate. This allows generation of gas to be happen at location.
- Running Cost
  - Commercial available hydrogen peroxide liquid can be used for our systems
- Heating Plate System
  - Distribution of gas is performed with compressed air and vaporization of hydrogen peroxide liquid for better distribution of gas.

## Why Airex

 $\geq$ 

# Airex focus on service, provides seamless operation and our track record with global pharmaceutical company proves it

#### **Track Record** Services Airex has specialized business units for We work with global pharmaceutical $\succ$ After Service and Maintenance companies in Japan and are getting traction from international customers Fast response We work with all major We work with global pharma We are getting tractions from Japanese pharma companies companies in Japan international customers Advise and support Sumitomo Dair BORYUNG **X**astellas GREEN Otsuka MERCK **SHIONOGI** DONG-A PHARM. Dongkook Daiichi-Sanky SANOFI Eisai 📲 Green Cross 🛅 SAMSUNG **KYOWA KIRIN** BIOLOGICS And more

## In Memoriam

We would like to express our deepest gratitude with this message of condolence for all the spore microorganisms contributed to ensuring sterility.
